

SPEECH RECOGNITION USING CATEGORIES AND SPEECH PREFIXING

ABSTRACT OF THE DISCLOSURE

5 Speech recognition utilizing categories and
prefixes is disclosed. Categories identify types of
recognition and allow different grammars and prefixes
for each category. Categories can be directed to
specific applications and/or program modules.
10 Uttering a prefix allows users to easily direct text
to specific grammars for enhanced recognition, and
also to direct the recognized text to the appropriate
application/module.
